An Ergonomic & Tactically Advanced Duty Gear Platform

CASES & POUCHES for a MOLLE VEST

It's a fact.

Law enforcement professionals have to carry a lot of gear. And the weight of all that gear adds up. More and more agencies are allowing their officers to utilize a molle vest – *which is great news for weight allocation*, however, improper gear-fitted cases and pouches can actually threaten LEO safety and hinder performance as well as look unbecoming of a professional serving their community.

Duckbill Law has the answer.

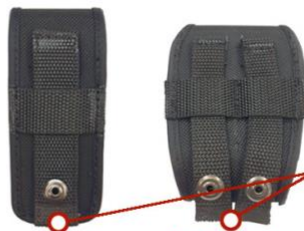

Since 2006 we have specialized in providing LEOs with an ergonomic duty belt & gear platform and have consistently created gear cases and pouches that are streamlined and lightweight. We're now applying our expertise and developing **the best molle vest gear cases and pouches available today**. And by utilizing a ballistic nylon finish, our gear complements the professional look all agencies are seeking.

The true benefit of our gear rests in the fact that our cases and pouches are made to **fit your specific gear**. No more general-sized soft or loose pouch that you "hope" will fit your gear. With Duckbill, your gear will fit our cases perfectly – *without any gear movement*.

Combine that with our docking system that prevents any case movement on the vest and you have a tactical situation that any time you access your gear **it's in the same spot – every time**. This develops muscle memory, which is especially important for those time-critical situations.

Standard molle vest with 1" x 1" docking sections

Narrow cases have 3/4" interweaving nylon band and one snap

Wider cases have 3/4" nylon band and two snaps

Stiff tabs provide for easy snapping

Duckbill interweaving snap docking system.
