An Ergonomic & Tactically Advanced Duty Gear Platform

# ERGONOMIC DUTY BELT & GEAR CARRYING PLATFORM

It's a fact.

Law enforcement professionals have to carry a lot of gear. And the weight of all that gear adds up. We are the premium manufacturer of stable, comfortable, tactical and high performance ergonomic duty belts and gear cases, holders and pouches for law enforcement officers and agencies.

Duckbill's innovative Max-Con™ docking technology allows the duty belt to be made more flexible than traditional belts. This patented docking platform is at the core of our **ergonomic innovation.** When modules link to the duty belt – *then cross link with our anchor belt* – all components are transformed into a stable and comfortable duty platform that properly allocates the weight of all the gear. And once positioned, all the gear stays in place. **NO SLIDING** or movement of gear cases or holders.

For the individual, this enhanced platform helps improve musculoskeletal health, inhibits belt induced back pain and reduces chronic fatigue caused by bouncing and shifting gear weight. It also assures the development of muscle memory, which holds **tactical importance** for those time-critical situations.

Velcro® Side of Patrol Belt

Case with Velcro® Clamshell

Fold Bottom Half of Clamshell Up

Fold Top Half of Clamshell Down to Secure Case

Duckbill Max-Con™ clamshell docking system.
